Installation Instructions

All electrical installation work must be carried out by an authorised installer and comply with the installation requirements in the country of use.

Cables and wiring installed in the cable duct must have at least double insulation and be type-approved and specifically intended for this installation method. The manufacturer's mounting and installation instructions must be followed.

The unit is intended for use within the scope of the Low Voltage Directive, i.e., up to 1000 V AC and 1500 V DC.

**The asphalt is dried
prior to installation**

The pieces are placed in position

ready for installation

The adhesive is heat-treated

Each stone is placed

and secured one by one

The stones can easily be cut

**to fit the dimensions of
the parking area**

**Time to install the pedestal
and chargers**
